SUMMARY

Since I was a child I believed that adult life was a great construction. What I have always loved in engineering was this ability to transform spaces for the better, only with knowledge. That's why I have always tried to get involved in projects that have a significant impact on people's lives. However, life isn't always as beautiful as in dreams, so I always try to keep working and persisting for what I believe.

ARTICLE PUBLISHING

The Influence of Iron Oxide-Based Pigments in the Properties of Portland and Cement Mortars

Congresso Técnico Científico da Engenharia e da Agronomia CONTECC'2018

- Work developed with colored mortars, using pigment based on iron oxide in its composition.

KEY COMPETENCIES

Bids and Contracts

- Bids and Contracts;
- AUTOCAD 2D;
- MS Project;
- CNH AB
- Bilingual English and Spanish;
- Excellent conflict resolution skills;

EDUCATION

Specialization in Composite Materials and Polymers, Mar 2021

Instituto de Pesquisas Tecnológicas - Ipt | São Paulo, SP

Bachelor of Civil Engineering, Feb 2019

Faculdade Ideal - FACI | Belém, PA

Technical course in Occupational Health and Safety, Oct 2015

Centro de Educação Profissional - DNA | Belém, PA

EXPERIENCE

Scientific Initiation Student - PICT

Faculdade Ideal - FACI | Jan 2017 - Dec 2018

- Trained exclusive dedication to approved work, performing results publications and presentations and submitting it as an article in magazines, congresses, and others.

Civil Engineering Intern

Building Serviços de Engenharia LTDA, BDL, Brasil | July 2017 - Dec 2017

- Assist in the preparation of projects, budgets, requirements and material control, coordinating and monitoring work teams inspecting the services, with the objective of delivering the work with the greatest functionality and security.
